1390 SUPER ADVENTURE S EVO FEATURES

ENGINE

The KTM 1390 Super Adventure range showcases a significantly reworked engine with a displacement increase from 1301 to 1350cc and cutting-edge camshift technology. This results in a power output of 173 PS and 145 NM or torque, all while meeting the latest Euro 5+ homologation standards, with valve clearance checks only necessary after 60000 km.

FUEL TANK

A completely redesigned 23 litre, 3-part fuel tank. This is made up of two large fuel cells on each side of the frame, with an upper, central vessel that supplies fuel to the lateral units. The fuel cap is also new and electronically controlled.

CRUISE CONTROL

The 1290 Super Adventure S features revolutionary radar-based Adaptive Cruise Control. To appreciate the magic of the ACC, you need to consider the ideal roads may lie hours away. With highways in between, ACC will let you breeze through the transit keeping you ready to strike when you get the chance. ACC "locks on" to a preceding vehicle, automatically adjusting speed and maintaining a safe following distance at all times. This results in more relaxed highway blasting when you need to cover gro
